

Phase 6: User Interface Development

Lightning App Builder

Record Pages

Record pages in a tourism management system are essential for organizing data. Key pages include Customer Information, Bookings, Destinations, Support, and Employee Records. These pages are customizable with features like related lists and activity timelines for efficient data management, contributing to a comprehensive dashboard for overall system performance analytics.

Home Page Layouts

The screenshot displays a Lightning App Builder interface for a 'Tourism Management' dashboard. The layout is organized into several sections:

- Left Sidebar (Components):** A list of components including 'Launchpad', 'List View', 'Lobby Management', 'LWC CRM Analytics Dashboard', 'Quip Associated Documents', 'Quip Document', 'Quip Notifications', 'Recent Items', 'Report Chart', 'Rich Text', 'runtime_odprelatedListTab', 'Scheduled Service Appointments', 'Tableau Pulse', 'Tableau View', 'Tabs', and 'Visualforce'. Below this is a 'Custom' section with 'Custom - Managed (0)'.
- Top Bar:** Includes 'Lightning App Builder', 'Pages', and 'Home' tabs. A 'Desktop' view selector and a 'Shrink To View' button are also present.
- Main Content Area:**
 - Department Table:** A table with columns: Approval ID, History, Department, Status. It lists various departments and their approval statuses.
 - Travel Approvals with Department Table:** A table with columns: Approval ID, History, Department, Status. It lists travel approvals and their statuses.
 - Cases by Type/Status Type Bar Chart:** A bar chart showing the distribution of cases across different types and statuses.
 - Travel Approval Report Donut Chart:** A donut chart showing the distribution of travel approvals across different categories.
 - Travel Expenses Table:** A table with columns: Expense Type, History, Department, Status. It lists travel expenses and their statuses.
- Right Sidebar (Page > Dashboard):** Contains a 'Dashboard' section with a 'Recommend Destination Package' button. Below this is a 'Set Component Visibility' section with a 'Filters' button. At the bottom, there is a 'Maximum Recommendations Displayed' section with a value of '1'.
